# MAHINDRA EXPANDS IN CANADA

Mahindra North America (MNA), in partnership with Bercomac, opened its sixth Mahindra Authorized Distribution Center (MADC) in Adstock, Quebec, Canada. MADC East Canada solidifies the partnership between Bercomac and Mahindra; this will provide the Canadian Mahindra dealer network with an in-country resource to efficiently supply product and service support from Mahindra, the world's number one selling tractor by volume.

"We are invested in expanding Mahindra's presence in the Canadian market and committed to delivering the resources our dealers need to be successful. Mahindra is seeing steady growth in brand awareness and sales of both tractors and utility vehicles, creating the need for a dedicated facility in Canada. This new facility increases our capacity, ensures that we keep pace with demand and enhances our ability to support the Mahindra Canadian dealer network," said Mani Iyer, President and CEO, Mahindra North America. "Bercomac has been a strong partner in Canada and we are pleased to expand our ties with the company."

This MADC, serving dealers throughout Canada, is a 22,000 sq. ft. assembly and distribution facility situated on 4.5 acres. It will bring new jobs to the community through direct employment and development of infrastructure for the new facility. To further support the Mahindra dealer network, the MADC also will serve as the Mahindra Regional Sales & Service Training center, offering easily accessible dealer development, sales and service classes.

"Mahindra offers quality, heavy-duty tractors, Canadian implements and utility vehicles that deliver reliable performance. This is an opportunity to grow the brand in Canada and

continue the tradition of providing customers with tough equipment that works as hard as they do," said Sebastien Acteau, President of East-Canada MADC. "We are pleased to partner with a company that stands behind its products with up to a seven-year warranty, invests to support its dealers, and also believes in driving positive change by supporting people and communities where they do business. We look forward to a long partnership with Mahindra."

Mahindra North America (MNA) is part of the US \$17.8 billion Mahindra Group's Automotive and Farm Sector – the only tractor manufacturer in the world to win the industry's top two quality awards: the Deming Application Prize and the Japan Quality Medal, care of Union of Japanese Scientists and Engineers.

The Mahindra Group also received the Financial Times "Boldness in Business" Award in the "Emerging Markets" category in 2013.

Mahindra's dealer network is growing across Canada faster than any other tractor manufacturer! Look for our booth at a show near you!

# The Simple Green Solution: MAHINDRA COMMON RAIL DIESEL (mCRD)

## ADVANTAGES OF AN mCRD ENGINE:

- Less Complexity: mCRD does not have a Diesel Particulate Filter, reducing complexity, heat and DPF filter replacement.
- No Operator Involvement: You don't need to remember to turn off your DPF. You can park your mCRD equipped tractor in the barn or use it in your hay field without worry because we don't have the high heat DPF.
- Cleaner Exhaust Emissions at Lower Cost: Diesel Oxidation Catalyst (DOC) after treatment system in mCRD does not require any high heat regeneration and meets emission standards at lower cost, less complexity and no involvement from the operator.
- Heavy Duty Wet Sleeve Engine: mCRDs are modern wet sleeve, heavy duty engines, built for tough jobs. mCRD: Cleaner, Greener and Simpler

# CANADIAN-BUILT IMPLEMENTS

## Post Hole Digger

Easily operated for precision. Sturdy frame ideal for more aggressive digging. Shear bolt protection. Category 1 or 2. Variety of auger sizes: 6", 9" and 12".

## Finishing Mower

Multipurpose adjustments: horizontal, height, flotation, all adaptable to various terrains. Low maintenance machine. Gear box has 5 yr warranty. Available in: 5' or 6' sizes.

## Grass Collector

Three bag system with a 12 bushel capacity. Deflector design fills all 3 bags evenly. Gas springs lift hood easily. Various models fit eMax, Max and 3016/3616 tractors.

## Tiller

All gear drive for a powerful and dependable performance. Major components are well-sealed to prolong life span. Slip clutch protection system. Comes in: 4', 5' or 6'.

## Rough Cutter – Standard or Heavy Duty

Round deck with channel reinforcements for extra deck strength. Dish style stump jumper offers more protection. Gear box has 5 yr warranty. Skid shoes are replaceable. Variety of sizes: 4', 5' or 6'.

## Bale Spear – Single or Double

Heavy duty welded steel frame construction. Parts bolted so they may be easily replaced or removed when needed. High weight capacity. Skid steer mount.

## Rear Blade – Standard or Heavy Duty

Has numerous angling and offset adjustments. Wear components such as cutting edge are bolted not welded so they may be replaced to extend the blade's life span. Parking stand assists in installing implement, making it a one-man job.

## Pallet Fork

Heavy duty welded steel frame construction. Guard & forks may be easily replaced when needed. Guard is flush with back rest for a more secure stability. Forks are adjustable from 5" to 40" wide. Skid steer mount. Available in 2000 or 4000 lbs. capacity.

## Rotary Broom

Stiff polypropylene brush may be used for sweeping, raking and light snow removal. Lifts and angles hydraulically. 60" model for eMax & Max, 66" model for 3016-3616/1533-1538-1526 & 2538 tractors. Mounting included may accept snowblower or blade.

## Box Scraper

Wide cutting edge in front and back not only protects the scraper but assists in successful results. Moves larger quantities of loose material to minimize work time. Reinforced slots for shanks to prolong life span. Sizes offered: 4', 5', 6', 7'.
